

**ABSTRACT OF THE DISCLOSURE**

It is an object of the invention to provide a storage medium or the like with which printing can be carried out easily by performing predetermined processing with respect to image data, and which allows, prior to operations, visual confirmation of changes in an image caused by the processing. The storage medium that is used for performing predetermined processing with respect to image data for printing with a printing apparatus, and that is provided independent of the printing apparatus, comprises process information for performing the predetermined processing, and information for allowing visual confirmation of a change in an image that is caused by the processing.
